5082 - 15" Roller

Typically For 20" Row Spacing

5083 - 28.5" Roller

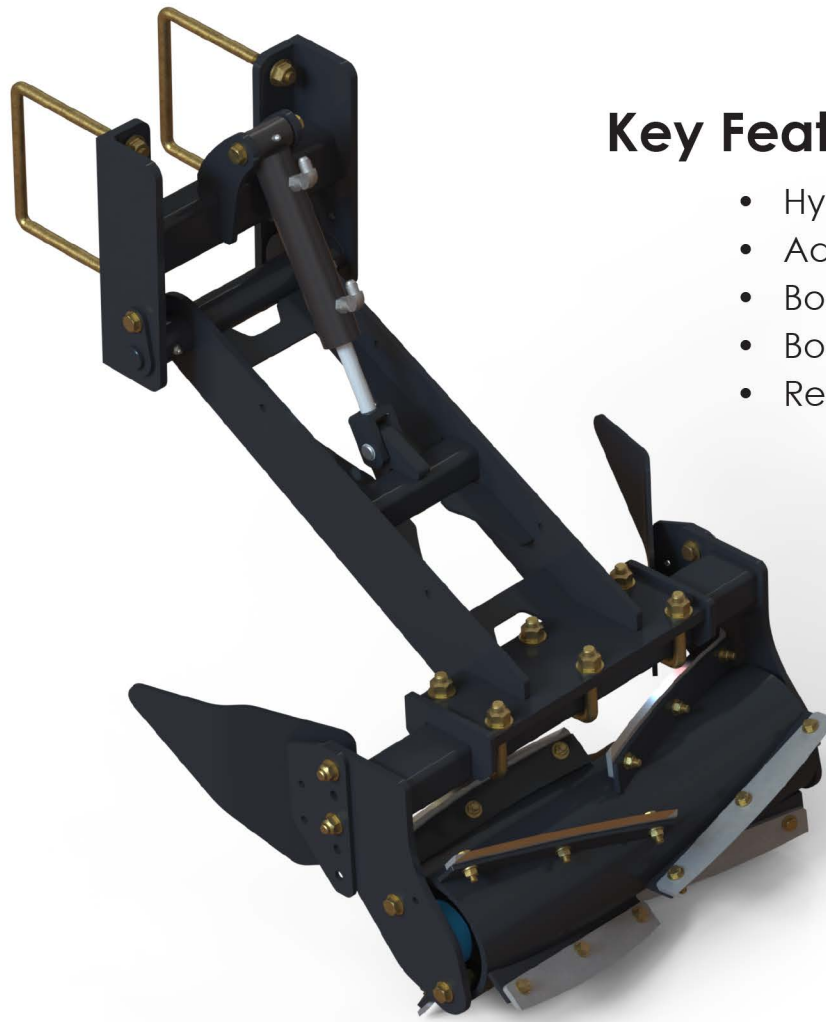

Typically For Full Swath

5084 - 39" Roller

Typically For Full Swath

5085 - 19" Roller

Custom Configurations Available

Key Features

- Hydraulic Downforce
- Adjustable Guards
- Bolt on Cutting Blades
- Bolt on Crimping Roller
- Replaceable Bushings

The InRowl, Dawn Equipment's answer to all-season cover crop control. Effective crimping is done in combination with hydraulic down pressure, adjustable guards, and the helical chevron pattern of the rollers. As the guards pull in, the pattern of the rollers fold material in as it passes over successfully crimping the cover. Individual row linkage allows for consistent crimping through the field as each row follows the contours. With interchangeable roller length options available, that same tool can easily flip between full swath and inner-row crimping.
