

DAWN[®]

PLURIBUS
COULTERS STRIP-TILL UNIT

- Trusted and Proven Coulters Design
- Integrated Hydraulic Down-Pressure System
- Trailing Hydraulic Row Cleaners
- Variety of Fertilizer Options

SPRING OR FALL

Run into wheat straw, bean stubble, corn stalks or green covers. Apply any combination of liquid or dry fertilizers. The Dawn Pluribus Strip-Till unit is the right tool for the job!

Stay well ahead of your planter! Run up to 10mph, with as little as 15hp per row. Plant into a clean, warm, dry, almost conventional strip yet leave all residue on the surface, making you money, not tying up Nitrogen.

Less fuel, time, fertilizer, equipment, and moisture loss. All adding up to more profit in your pocket.

Row unit also available as a Pneumatic System!
